

Safend Discoverer: Data... classified, found and secured

If they've got it, Discoverer will find it

Protecting your sensitive information from within, the Safend Discoverer lets you know who has what. Built to provide strong rules-based data classification, Discoverer silently scans your company endpoints with minimal disruption to daily activities. Having strong alerting and reporting capabilities, Discoverer uses keywords and pattern recognition technologies to identify and notify on inappropriate data presence. Part of Safend Data Protection Suite, Discoverer provides the knowledge and insight for security personnel to introduce current and strong data security policies to protect sensitive company information.

Safend DPS, the Data Protection Suite

One DPS suite, one DPS agent

Protector:
controlling port
and device endpoints
and media encryption

Encryptor:
transparent encryption
on laptops and PCs

Inspector:
inspects, classifies and
blocks sensitive data leakage

Discoverer:
locates and maps
sensitive data at rest

Reporter:
regulatory compliance
reports and security
log summaries

Auditor:
immediate risk detection
on WiFi ports/devices
connected to endpoints

Forgot you had it? Discoverer remembers

- Data classification based on keywords and pattern recognition of text and metadata, mathematical and logical verifiers, file types and data fingerprinting
- Mapping and locating classified data saved on organization endpoints and alerting on their presence
- Ability to create and implement companywide security procedures and policies based on insight from detailed reports and logs on classified data
- Preconfigured security policies addressing specific regulatory compliance standards, such as PCI, HIPAA and European privacy legislation

Supported by Safend Discoverer
